CHINA ORDERS NATIONWIDE EMISSION CUTS BY 2015

Beijing, China: China has ordered local governments to reduce emissions of "major pollutants" by as much as 10% by 2015, amid growing public anxiety over the country's bad air.

Millions of Chinese went online to vent their anger over the thick smog that has blanketed Beijing earlier of the month raising health fears and causing hundreds of flights to be cancelled.

China's emissions of nitrogen oxide—the main cause of urban smog. Nitrogen oxide is released by power plants, heavy industry and cars (www.factsanddetails.com).

The state council announced "Total emissions of major pollutants should be reduced significantly by 2015, Urban and rural drinking water supply and environmental security should be protected"

The announcement comes amid public debate over china pollution where more than 30 years of rapid economic growth has left the country's air, soil and waterway severely contaminated.

MERRY CHRISTMAS AND HAPPY NEW YEAR!

" 100 % Environmental Compliance To DOE Industrial Effluent Standard B"

"If fail, subject to Max Fine of RM 100,000 and Max Imprisonment of 5 years or Both "

DOE Standard B:

- * COD = 200 mg/l
- * BOD = 50 mg/l
- * Zinc = 2 mg/l
- * O&G = 10 mg/l
- * pH = 5.5 - 9.0
- * TSS = 100 mg/l

Environmental Fact:

Air gets polluted by the exhaust fumes of vehicles, pollutants from construction work, industry, open burning, dirt from non tar roads, coal power plant and etc

**Christmas is more than giving;
Christmas is loving. Loving mother nature is an expression of Love for future generations. Attached are tips for an eco-friendly xmas.**
