

Key messages delivered by Tan Sri at the Top Glove Anti-Corruption Campaign

1. What is corruption ?

- Corruption is abuse of power entrusted for personal gain which will sacrifice the interest of other party / company / society / country.

2. Why Corruption Happen ?

- Basically corruption happen due to people live beyond their mean or in other word they spend more than their earn / with high financial commitment.
- Corruption is like diabetes. Although many people aware that diabetes, over weight and smoking are bad for health but people still eat and smoke without proper self control.
- Corruption also attributed to people tend to compare with their neighbours, colleagues, relatives and friends on big house, big car, buy luxury items and etc which caused personal financial commitment higher than their income.
- We need to self control and manage our financial commitment, in order to prevent corruption.

3. How to combat / against corruption ?

- We need to invest in prevention and education. We need to continuously educate our staffs, workers and family members on the negative consequences of corruption.
- In Top Glove, we shall continue our good practices such as to ask our staffs and suppliers to sign letter on enforcement of Top Glove corporate / anti corruption culture, wear anti corruption badge every day, display anti corruption sign board at the main gate of all factories and organise more programs such as anti corruption talk and other educational / awareness activities to consistently remind ourselves not to involve in corruption practice.
- Prevention is certainly more meaningful than cue or to take corrective action after corruption happen.
- Anti corruption is a concerted effort and therefore private and government sector shall work hand in hand in this noble initiative towards building a company / society / country with high honesty, transparency and integrity.
